# Python assignment

**Python Assignment 2: Data Structures - List, Dictionary, Set& Conditional Statements.**

## 1)List (Creation, Modification and Access):

**Created and modified lists , using**

**Append()**

**Insert()**

**Remove()**

**Pop()**

**Extend()**

**2) Dictionary (Creation, Modification and Access):**

**Created a dictionary and added , updated students marks.**

## 3) Sets (Operations):

**Created sets and performed union and intersection**

**Attempt to change the value of my_set[4] = 's'. code throws an error,**

**Because, Sets are unordered and do not support indexing.**

## 4)Operators & Conditional Statements :

## (IF, ELIF, ELSE)

## Created a performance category program using if,elif,else
